

345ROBOTICS

Building the future of the Cayman Islands through competitive robotics

Vision

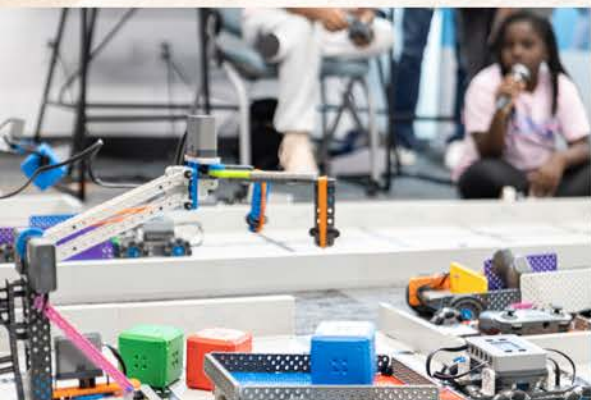

We inspire and empower children and young people in Cayman from all backgrounds to participate in robotics competitions and thereby acquire skills that will enhance their future prospects.

What we do

We are the Cayman Islands partner for VexIQ, the world's largest robotics competition, with more than one million competitors globally.

VexIQ is a **fun, practical and inclusive STEM experience** outside the classroom, with hands-on robotics games, coding and related activities. It is designed around team work and collaborative problem solving, for young people ages 8-14.

In 2024-24 we are participating in the VexIQ Robotics Competition "Rapid Relay" and preparing to send Cayman Islands teams to global competitions - including the VexIQ World Championship in Dallas (April 2025).

345Robotics was founded by parents in 2019, and we foster a fun and inclusive STEM community. In addition to low cost summer camps, we have offered robotics at no cost to hundreds of children through volunteer work in the community, partnerships with fellow non-profit organizations, and many government schools in Cayman.

Summer 2024 Sponsors

Ministry of Investment,
Innovation & Social
Development

Sponsorship opportunities

If you or your company would like to support Cayman youth after our hugely successful 2024 Summer Camp, we are seeking an array of sponsors for 2024-25.

- Support our local competitions & recruitment/training of staff
- Sponsor participation of diverse students in after school and weekend programs
- Create opportunities for our teams to participate in global competitions (in the US)

Please contact Ian Gilmour Director, 345 Robotics Foundation (NPO) for more information & to arrange for an in-person briefing.
